

CERTIFIX RBS STRUCTURAL RIVETS A4/A4 STAINLESS STEEL

PRODUCT DESCRIPTION

The Certifix RSB stainless steel rivets are engineered to excel in demanding environments requiring exceptional tensile and shear strength. Their multi-grip range, combined with high resistance to both tensile and shear forces, ensures a secure and durable connection. Their unique design ensures complete hole filling, preventing moisture and pressure ingress, whilst their A4 composition makes them ideal for applications where corrosion resistance is key.

PRODUCT FEATURES

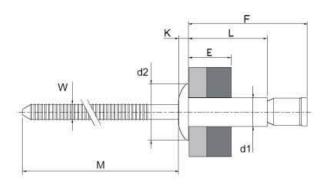

- Multi-grip range features.
- High resistance to tensile and shear strength.
- The hole is filled thoroughly.
- Moisture and pressure tight.
- A4 stainless for high corrosion resistance.

APPLICATIONS

- Vehicle structures
- HVAC
- Construction
- Solar Energy

->	9.900 N min.
	8.100 N min.
Mandrel breaking load	13.230 N max.

TECHNICAL DATA
